helping
communities
fund tomorrow

for detail tomorrow but in short, the fee covers mostly the GIS work in producing the boundary map. Once that work is completed we can produce a variety of maps based on that work. At this time what is required is the assessment diagram to be recorded. Just below is a sample of A CFD boundary map. The assessment diagram will look similar to this type of map.

The sample is from a current project we are working on and is similar to what we discussed for the district boundary map displaying, different property types/classes. This type of map can be included in the MDP as well as displayed on the District's website replacing the existing pdf file. This map I will include at no cost since it will be based on the same datasets.

Thanks, Lorena. I hope this helps. Please let me know a good time tomorrow and I'll give you a call from the road.

Best,

DAVID SCHROEDER

Absolutely. I'm out of the office tomorrow but can give you a call to discuss and email you examples tonight.

What's a good time for you tomorrow?

David,

I'm not sure I fully understand the scope. Can we discuss tomorrow? Do you have a sample that you can show me?

Thanks.

Good evening, Lorena.

We've finished reviewing the data provided and can prepare the assessment diagram for a flat fee of \$2,500. Included will also be a pdf map which you can use on the District's website.

Additionally, I can prepare that web app demo I mentioned with the information to facilitate the conversation with the large property owner. This will be an interactive map displaying the various parcel classifications we discussed.

Please let me know if you'd like to move forward and I will provide you with an agreement.

Thanks, Lorena. Please don't hesitate to contact me if you have any questions or if I may be of service.

Best regards,

Thanks, Lorena.

Quick question. Just to confirm for the existing Port of LA parcels, the second dash should be three characters from the right, making the first APN 7440-024-911 and so on, correct?

David,

Attached is our current assessment database as well as the possible expansion parcels. I would want the map to differentiate the following parcels:

Existing parcels (non-Port of Los Angeles)

Existing Port of LA parcels. These are the current Port of LA Parcels.

7440-02-4911

7440-02-6903

7440-03-0906

7440-03-0908

7440-03-1904

7455-01-9916

7455-01-9922

7455-02-7932

7455-02-7933

Possible expansion parcels. - See attachment.

I look forward to receiving your proposal.

Hi Greg,

Does NBS produce parcel maps? I'm doing our BID renewal.

I look forward to hearing from you.
